HEMLATA STHM TRUST, ODISHA

Regd. No. 41131808632, Bhubaneswar Office Ph. No. 8763725197

DONATION FORM

For Treatment, Medication and support of patients living with
SICKLE CELL DISEASE / HEMOPHILIA / THALASSEMIA

These are three hereditary blood disorders. In unawareness, the defective gene gets transmitted through generations. Children or the patients living with these disorders suffer from childhood till their last breath.

SICKLE CELL DISEASE : Suffer from painful crisis and need hospitalization for active management with powerful analgesics, hydration and medications to control of infection.

THALASSEMIA : Suffer from blood deficiency from early childhood and has to undergo repeated blood transfusion along with other medication to remove iron from their body.

HEMOPHILIA : Suffer from repeated bleeding in joints, with or without injury. Active management with factors or blood products is required. Still they become physically impaired and disabled. Physiotherapy plays an important role for limiting their disability and bleed events. Sometimes they need orthotics which are highly expensive.

MANAGEMENT : They need treatment, care and management throughout their life . Hemlata STHM organization provides a charitable service of physiotherapy and doctors consultation for these disorders.

Mission and Vision : Cares for patients with genetic blood disorder

The management of these cases is highly expensive for poor and underprivileged patients, therefore it demands generous donations from " YOU " whole heartedly for their struggle and survival.

" HELPING HANDS ARE BETTER THAN PRAYING LIPS "
